OBJECTIVE

A full stack web developer proficient in the MEAN STACK ecosystem capable of building scalable robust and secure web apps. I strive to become one of the best if not the best developer in my field of expertise where my integrity and commitment to my work shall testify for itself. Am very curious and willing to learn and grow my skills even further in the Angular express, node.js, mongodb, mySql, postgres, ecosystems. Also to the that would engage in the mentoring of other young upcoming developers in the same fields that am in
